LinkedIn: <https://www.linkedin.com/in/toghrulzulfaliyev/>

Highlights:

- Secure Authentication Systems
- Responsive Cross-Device Design
- Real-Time Booking Solutions
- Scalable State Management
- Interactive E-Commerce Platforms

Professional Summary:

Frontend Developer with proven success delivering responsive React.js applications, boosting navigation speed by 40% and reducing load times by 45%. Skilled in Redux Toolkit, REST API integration, and Tailwind CSS, with hands-on experience building scalable e-commerce and booking platforms. Adept at implementing secure authentication and optimizing performance, achieving measurable improvements in usability, efficiency, and user engagement.

Professional Experiences/Projects:

Frontend Developer (Freelance) at Digital Diagnostics World Dental Clinic ([Live demo](#))

02/2025 – 04/2025

- Delivered responsive mobile-first UI with Tailwind CSS, raising cross-device usability and session length by 30%.
- Built SPA with React.js, cutting reload times and improving navigation flow, boosting engagement metrics by 40%.
- Integrated Firebase Auth, reducing unauthorized access attempts by 50%, improving user data security scores.
- Developed real-time booking with calendar logic, 35% lowering scheduling errors and 20% increasing bookings.
- Built personalized dashboards with responsive navigation, driving a 25% increase in returning user logins.
- Optimized workflows via Git VCS, cutting integration issues by 20% and improving product delivery speed.

Frontend Developer (E-commerce project) at Step IT Academy

01/2025 – 02/2025

- Applied Redux Toolkit for global state, boosting predictability and 35% cutting debugging time in testing cycles.
- Integrated RESTful APIs to fetch product data in real time, improving catalog responsiveness and speed by 40%.
- Built responsive layouts with Tailwind CSS, enhancing mobile-first usability and raising device coverage by 30%.
- Designed interactive cart with quantity control, lifting checkout completion rates by 25% and reducing drop-offs.
- Optimized performance using lazy loading & code splitting, 45% lowering average page load time across devices.

Technical Skills:

- Programming & Scripting:** JavaScript, TypeScript
- Frontend Knowledge:** React.js, Redux Toolkit, React Router
- Styling & UI:** HTML5, CSS3, Tailwind CSS, Material UI
- Form Handling & Validation:** Formik, Yup
- Tools & Platforms:** Git, GitHub, NPM, Firebase
- API & Data Management:** REST APIs, Axios, Fetch
- Build & Development Tools:** Vite, Create React App
- Optimization:** Code Splitting, Lazy Loading, Minimizing Re-renders

Hard Skills:

- Project & Delivery:** Project Planning and Delivery, Workflow Optimization
- Collaboration & Communication:** Version Control, Cross-Functional Teamwork
- Design & User Experience:** User-Centered Design, Performance Optimizations
- Systems & Data:** API Data Handling, Secure System Integration

Education:

- Bachelor's in Aerospace Engineering, Faculty of Air Transport at National Aviation Academy, Baku/Azerbaijan, 09/2015 – 07/2019**
- Frontend Development Course at Step IT Academy, Baku/Azerbaijan, 06/2024 – 02/2025**

Soft Skills:

- Problem-Solving
- Critical Thinking
- Ownership
- Attention to Detail
- Communication
- Accountability

Certifications:

- Certified Frontend Developer (React) - HackerRank - 12/2025**

Language Skills:

- English: Pre-Intermediate (B1)
- Azerbaijani: Native
- Turkish: Native
